Cervical Screening and Breast Awareness Training

This course is suitable for all health professionals who intend to take smears or already take smears but have not had formal training.

Aim

The overall aim of the course is to offer a common core of learning to all health professionals who are involved in smear taking and promoting breast awareness among women.

E- Learning Programme

This programme aims to deliver the theoretical information required. The course is structured into modules which will facilitate the development of knowledge, skills and competence, which are essential for effective service delivery. There is no single route through this programme that you have to take. You can work through the modules at your own pace,

Clinical

The clinical component will take six months to complete. During this period a required number of supervised and unsupervised smears will be recorded in a Clinical Practice Portfolio, together with a short reflective account of each to demonstrate your learning experience. You will also have two clinical assessments by an assessor appointed by Cervical Screening Wales.

What does the course consist of?

- Theoretical elearning package
- Practical study day
- 6 months supervised clinical practice
- 2 clinical assessments
- Submission of a clinical practice portfolio

Is there a cost?

- Yes there is a cost of £200 per person
